

Setting up a Hikvision P2P Account Using iVMS 4500 App

1. Open the Configuration Page

- Click the Menu icon

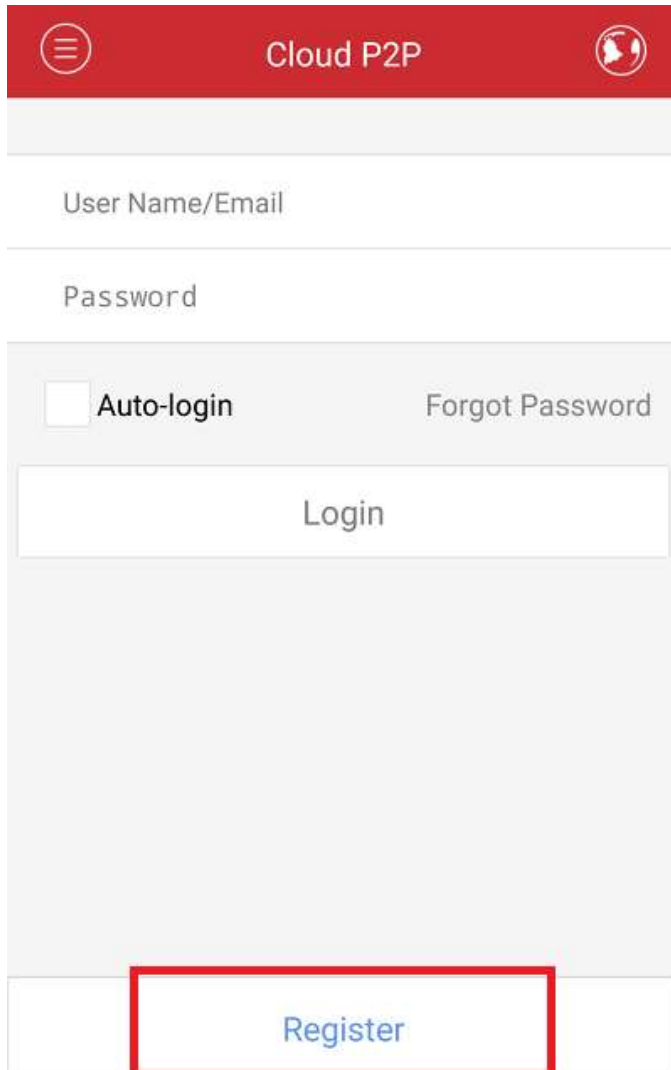

2. Click on Cloud P2P

3. Create a P2P Account

- Enter your Email Address
- Create a Password (Take note of this!)
- Click 'Register' to continue

Cloud P2P

User Name/Email

Password

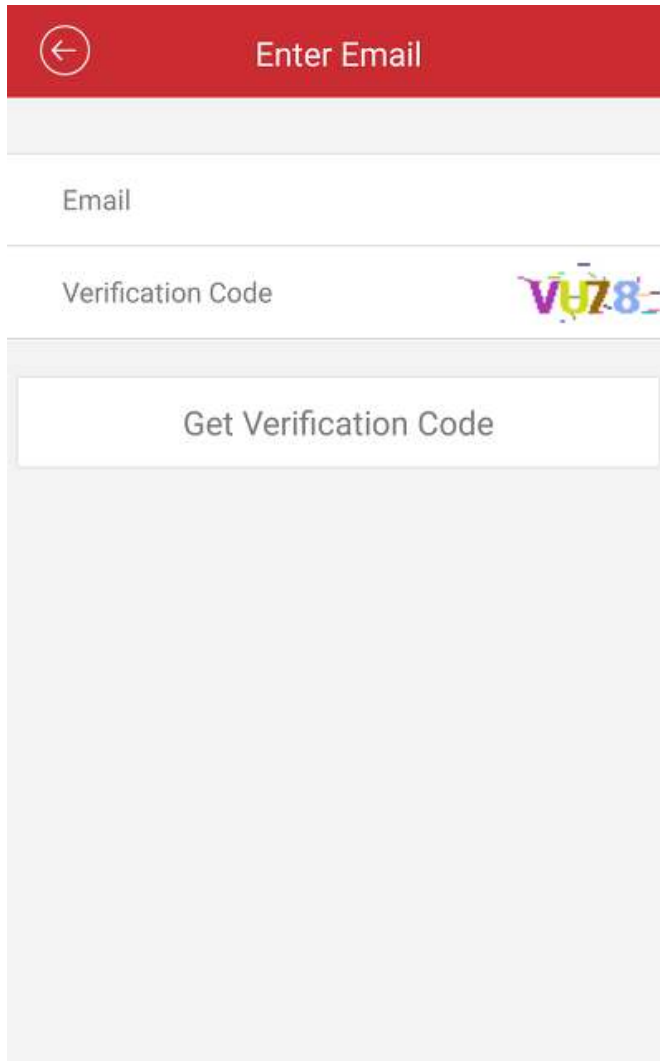

☐ Auto-login [Forgot Password](#)

Login

Register

4. Enter Email Address & Captcha

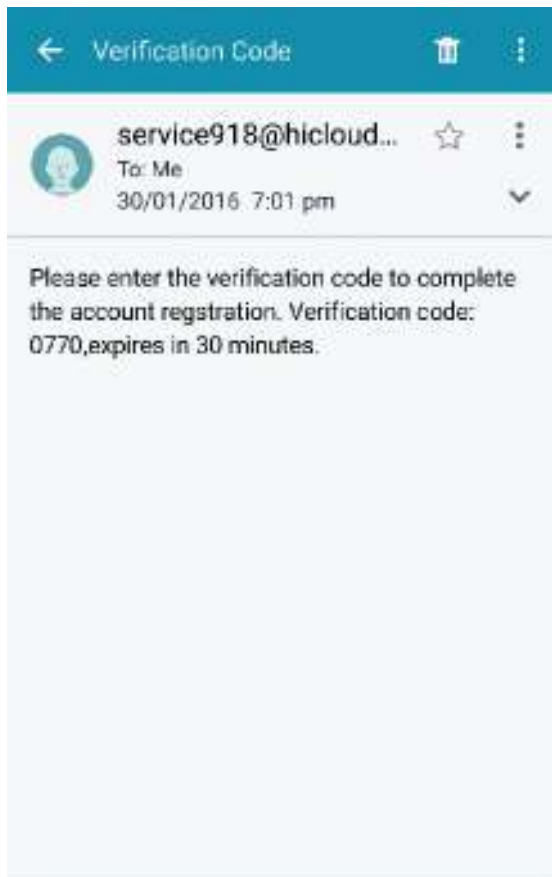

- Enter your Email Address
- Enter the Captcha Code
- Click 'Get Verification Code'

The screenshot shows a mobile application interface with a red header bar. The header bar contains a back arrow icon on the left and the text "Enter Email" in the center. Below the header bar, there is a light gray input field labeled "Email". Below the "Email" field, there is another light gray input field labeled "Verification Code". To the right of the "Verification Code" field, there is a colorful captcha image showing the characters "VU78". Below the "Verification Code" field, there is a white button with the text "Get Verification Code". The background of the app is light gray.

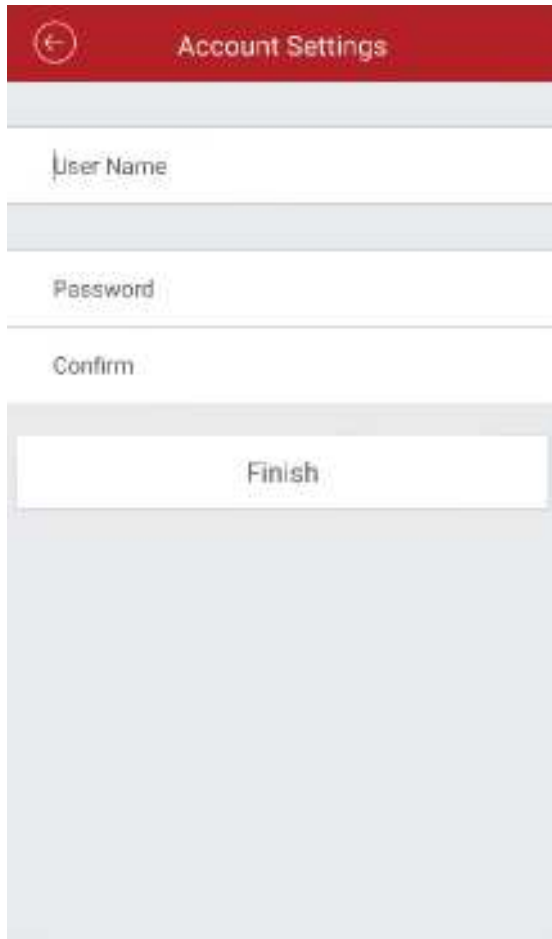

5. Retrieve the Verification Code From Your Email Account

- Login to your email account and look for an email with your Verification Code
- It will normally be a 4 digit number and will expire after 30mins

6. Enter User Name & Password For P2P Account Then Click Finish

- Enter the username you wish to use to login to your account
- Enter the 4 digit verification code obtained previously
- Then click 'Finish' to complete registration

Notes

- Once created you can use your P2P account with iVMS 4500
- You can login using your username/email address and password
- Multiple Hikvision DVRs can be added on a single account
- Your Hikvision account login details should be kept private
